

**Gregory Dotson**  
**STEM Ambassador**  
**Business Information and Technology**  
**(BIT)**

***Q: How did you select your college major or certification program?***

**A:** I chose my major by going through a lot of trial and error with different majors. In fact, I went through my whole freshmen year being indecisive on what I wanted to do in the future. After much experimenting, I ran into Business Information and Technology. I knew I wanted to be a business major and BIT is both Business and Technology, which gives me the best of both worlds.

***Q: What was the biggest influence in your selection of major/career?***

**A:** Talking with my counselor and my dad is what really gave me the final push to choose this major. They both told me that it fit me and I could do well with the major.

***Q: If you could go back to high school and select any elective course to take that would have better prepared you for college, what would it be?***

**A:** I would have asked for more business and computer classes. I am sure that taking classes like that in high school could have helped me be just a bit more prepared for college.

***Q: What is your favorite aspect of your major?***

**A:** My favorite aspect is that my major is both Business and Technology. Like I mentioned earlier it gives me the best of both worlds.

***Q: How do you/your major make a positive impact on society/our community?***

**A:** Learning new ways of technology can potentially lead me into a business where I could provide new and better ways or devices that could help our society.

***Q: What's the most interesting thing you have been able to do in your college career?***

**A:** Joining several different clubs around campus which has gotten me involved and also helped make new friends.

***Q: What makes you get up each morning excited about your major?***

**A:** The fact that my major has so many different aspects in it makes me excited that I can learn and potentially do many different things with it.

***Q: What advice would you share with K-12 students who are considering your major?***

**A:** My advice for people who are considering this major is to make sure you do your research about it, and make sure you can think of a job that you will love doing with this major in the future.
